#### **INDEPENDENT AUDITOR'S REPORT**

To The Honorable Mayor and Members of Town Council Town of Round Hill, Virginia Round Hill, Virginia

We have audited the accompanying financial statements of the governmental activities, and the business-type activities of the Town of Round Hill, Virginia, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, and the business-type activities of the Town of Round Hill, Virginia, as of June 30, 2016, and, the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Other Matters**

#### **Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 4–10 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town of Round Hill, Virginia's, basic financial statements. The supplementary general fund schedules and other supplementary schedule are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary general fund schedules and other supplementary schedule are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

November 16, 2016 Leesburg, Virginia

Mitchell & Co., P.C.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the Town of Round Hill, Virginia, we offer readers of the Town's financial statements this narrative overview and analysis of the financial activities of the Town of Round Hill, Virginia for the fiscal year ended June 30, 2016.

## **Financial Highlights**

- The assets of the Town exceeded its liabilities at the close of the most recent fiscal year by \$22,446,278.
- The Town's total net position increased by \$8,709,502.
- As of the close of the current fiscal year, the Town of Round Hill's governmental funds reported combined ending fund balances of \$2,775,503, an increase of \$205,567 in comparison with the prior year. Total amount, \$887,776, is available for spending at the government's discretion.
- The Town's total bonded debt decreased by \$215,000 (3.41% percent) during the current fiscal year.

### **Overview of the Financial Statements**

This discussion and analysis is intended to serve as an introduction to the Town of Round Hill, Virginia's basic financial statements. The Town's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

**Government-wide financial statements.** The government-wide financial statements are designed to provide readers with a broad overview of the Town's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all Town assets and liabilities with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the Town of Round Hill that are principally supported by taxes and intergovernmental revenues, (governmental activities), from other functions that are intended to recover all or a significant portion of their costs through user fees and charges, (business-type activities). The governmental activities of the Town of Round Hill include general government, public safety, and public works. The business-type activities of the Town include water and sewer. The government-wide financial statements can be found on pages 11-12 of this report.

**Fund financial statements.** A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Town of Round Hill, Virginia, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into two categories: governmental funds and proprietary funds.

**Governmental funds.** Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of expendable resources, as well as on balances of expendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 13-16 of this report.

**Proprietary funds.** The Town of Round Hill, Virginia uses enterprise funds to report the same functions presented as business-type activities in the government-wide financial statements. The Town's only enterprise fund is the water and sewer fund. Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewer fund, which is considered to be a major fund of the Town.

The basic proprietary fund financial statements can be found starting on pages 17-19 of this report.

**Notes to the financial statements.** The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 20-54 of this report.

**Supplementary Information.** A detailed schedule of general fund revenue and expenditures along with additional supplementary information are presented immediately following the notes to the financial statements. This supplementary information can be found on pages 55-57 of this report.

#### **Government-wide Financial Analysis**

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Town of Round Hill, Virginia, assets exceeded liabilities by \$22,446,278 at the close of the most recent fiscal year.

By far the largest portion of the Town's net position reflects its investment in capital assets (e.g., land, buildings, machinery, and equipment) less any related debt used to acquire those assets that is still outstanding. The Town of Round Hill uses these capital assets to provide services to its citizens; consequently, these assets are not available for future spending. Although the Town's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. The following table presents a summary of the Town's net position by type of activity as of June 30, 2016.

	vernmental		Business-type		Total
	 Activities	Activities		Activities	
Assets					
Current and other assets	\$ 992,330	\$	4,661,536	\$	5,653,866

Net investment in capital assets	1,887,727		15,117,598		17,005,325
Unrestricted	 887,776		4,553,177		5,440,953
Total Net Position	\$ 2,775,503	\$	19,670,775	\$	22,446,278

## **TOWN OF ROUND HILL - NET POSITION**

The remaining balance of unassigned net position may be used to meet the government's ongoing obligations to its citizens and creditors.

At the end of the current fiscal year, the Town of Round Hill is able to report positive balances both of the categories of net position for the government as a whole. The same situation held true for the prior fiscal year.

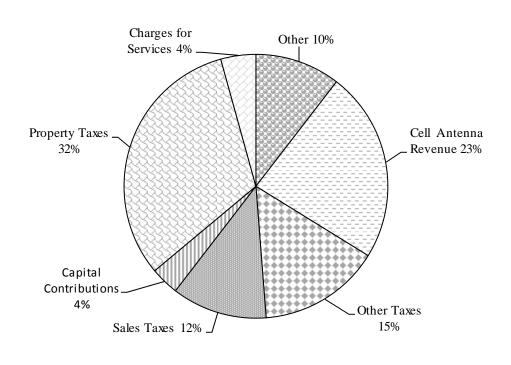

The Town's net position increased by \$8,709,502 during the current fiscal year.

**Governmental activities.** Governmental activities increased the Town's net position by \$205,567. These changes are presented in column one of the following table:

			Business-type Activities		• •		Total
Program Revenues							
Charges for services	\$ 23,689	\$	1,810,134	\$	1,833,823

# TOWN OF ROUND HILL - CHANGES IN NET POSITION

The following chart presents a graphic representation of the Town's governmental activities and the related revenue structure for fiscal year 2016.

#### **Revenues by Source – Governmental Activities**

**Business-type activities.** Business-type activities increased the Town's net position by \$8,503,935, accounting for 97.6 percent of the growth in the Town's net position. Key elements of this increase are as follows.

• Capital contributions are a major revenue source of water and sewer system development and for 2016 included cash availability fees of \$864,251 and deeded infrastructure of \$7,968,765.

#### Financial Analysis of the Government's Funds

As noted earlier, the Town of Round Hill, Virginia uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

**Governmental funds**. The focus of the Town's governmental funds is to provide information on nearterm inflows, outflows, and balances of expendable resources. Such information is useful in assessing the Town's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year. As of the end of the current fiscal year, the Town of Round Hill's governmental funds reported ending fund balances of \$820,872, an increase of \$55,281 in comparison with the prior year. This fund is unassigned fund balance, which is available for spending at the government's discretion.

At the end of the current fiscal year, unassigned fund balance of the general fund was \$820,872. As a measure of the general fund's liquidity, it may be useful to compare unassigned fund balance to total fund expenditures. Unassigned fund balance of \$820,872 is greater than the total general fund expenditures of 711,938.

The fund balance of the Town of Round Hill, Virginia's general fund increased by \$55,281 during the current fiscal year. The key factors in this increase are capital contributions.

**Proprietary funds.** The Town of Round Hill's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Net position of the water and sewer fund at the end of the year amounted to \$19,670,775. The total growth in net position for proprietary funds was \$8,503,935. Other factors concerning the finances of these funds have already been addressed in the discussion of the Town's business-type activities.

### **Capital Asset and Debt Administration**

**Capital assets.** The Town of Round Hill, Virginia's investment in capital assets for its governmental and business-type activities as of June 30, 2016, amounts to \$21,202,649 (net of accumulated depreciation). This investment in capital assets includes land, buildings and system improvements, machinery and equipment, and roads.

Major capital asset events during the current fiscal year include purchase of water meters, park improvements and purchase equipment, and sidewalk improvements during the year.

The table below summarizes the capital assets of the Town at June 30, 2016.

(Net of accumulated depreciation)							
		overnmental Activities		usiness-type Activities		Total	
Land	\$	1,127,067	\$	541,464	\$	1,668,531	
Buildings and improvements		172,280		3,824,306		3,996,586	
Parks and improvements		177,844		-		177,844	
Utility distribution systems		-		16,488,639		16,488,639

Machinery and equipment		30,638		348,240		378,878	
Sidewalk improvements		378,000		-		378,000	
Total	\$	1,887,727	\$	21,202,649	\$	23,090,376	

# TOWN OF ROUND HILL - CAPITAL ASSETS

Additional information on the Town of Round Hill capital assets can be found in note III. D on pages 45-46 of this report.

**Long-term debt.** At the end of the current fiscal year, the Town of Round Hill, Virginia had total bonded debt outstanding of \$6,095,000. This entire amount comprises debt backed by the full faith and credit of the government even though all of it will be repaid from proprietary fund revenue.

Additional information on the Town of Round Hill's long-term debt can be found in note III. E on pages 47-48 of this report.

## **Requests for Information**

This report is designed to provide a general overview of the Town of Round Hill's finances for all those with an interest in the government's financial operations. Questions concerning any of the information provided in this report or requests for additional financial information should be directed to the Town of Round Hill, 23 Main Street, P.O. Box 36, Round Hill, Virginia 20142.

# TOWN OF ROUND HILL, VIRGINIA RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES FOR THE YEAR ENDED JUNE 30, 2016

Amounts reported for governmental activities in the statement of activities are different because:	
Net change in fund balances - total governmental funds	\$ 55,281
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount of capital assets recorded in the current period.	174,710
Depreciation expense on capital assets is reported in the government-wide statement of activities and changes in net position, but they do not require the use of current financial resources. Therefore, depreciation expense is not reported as an expenditure in governmental funds.	(22,444)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.	(9,091)
Pension funding obligation is reported in the government-wide statement of activities and changes in net position, but does not require the use of current financial resources. Therefore, pension obligation	
requirements are not reported as a liability in the governmental funds.	 7,111
Change in net position of governmental activities	\$ 205,567
The notes to the financial statements are an integral part of this statement.

## NOTES TO THE FINANCIAL STATEMENTS

#### I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Town of Round Hill, Virginia (the Town) was established in 1900. The Town is governed by a mayor and a six member town council who are elected at large for a four year term.

The financial statements of the Town have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The following summary of the more significant policies is presented to assist the reader in interpreting the financial statements and other data contained in this report. These policies, as presented, should be viewed as an integral part of the accompanying financial statements.

### A. Reporting Entity

The Town of Round Hill, Virginia (government) is a municipal corporation governed by an elected mayor and sixmember Council. The accompanying financial statements present the government and its component units, entities for which the government is considered to be financially accountable. Financial accountability is defined at appointment of voting majority of the component unit's board and either (a) the ability to impose its will on the component unit, or (b) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government.

Based upon the above, all potential component units were evaluated for inclusion in the reporting entity and it was determined that there are no component units requiring inclusion in the Town's reporting.

#### **B.** Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e. the statement of net position and the statement of changes in net position) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *Business-type activities*, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds and proprietary funds. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements.

## NOTES TO THE FINANCIAL STATEMENTS

## I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the *accrual basis of accounting*, as are the proprietary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available.

Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 45 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Accordingly, real and personal property taxes are recorded as revenues and receivables when billed, net of allowances for uncollectible amounts. Property taxes not collected within 45 days after year end are reflected as deferred revenues. Sales, which are collected by the state and subsequently remitted to the County, are recognized as revenues and receivables upon collection by the state or utility, which is generally in the month preceding receipt by the County. Utility taxes are collected by the utilities and remitted directly to the Town.

Licenses, permits, fines and rents are recorded as revenues when received. Intergovernmental revenues, consisting primarily of federal, state and other grants for the purpose of funding specific expenditures, are recognized when earned or at the time of the specific expenditure. Revenues from general purpose grants are recognized in the period to which the grant applies. All other revenue items are considered to be measureable and available only when cash is received by the government.

The government reports the following major governmental funds:

The *general fund* is the Town's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The government reports the following major proprietary funds:

The *utility fund* accounts for the activities of the Town's water and sewer operations.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the government's water and sewer function and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

## NOTES TO THE FINANCIAL STATEMENTS

### I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### C. Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the water and sewer enterprise funds are charges to customers for sales and services. The authority also recognizes as operating revenue the portion of tap fees intended to cover the cost of connecting new customers to the system. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When assigned, restricted and unassigned resources are available for use, it is the government's policy to use restricted resources first, then assigned and then unassigned resources as they are needed.

#### D. Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position or Fund Balance

#### 1. Deposits and Investments

The Town's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition. Investments are stated at fair value, which approximates cost due to the short-term nature of the investment maturities.

#### 2. Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" or "advances to/from other funds." All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

The trade and property tax receivables are shown net of an allowance for doubtful accounts. The allowance for doubtful accounts is determined using historical collection data and account analysis.

Real estate and personal property taxes are assessed annually by Loudoun County, Virginia for all property of record as of January 1. The Town bills and collects its own property taxes based on the assessed values provided by the County. Real estate and personal property taxes are levied annually on January 1 and are due December 5.

## NOTES TO THE FINANCIAL STATEMENTS

### I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### **D.** Assets, Liabilities and Net Position or Fund Balance (Continued)

#### 2. Receivables and Payables (Continued)

Collections of real and personal property taxes between July 1 and August 15 of the subsequent fiscal year, classified as delinquent at June 30, are recorded as revenue for the fiscal year then ended, in accordance with the standards established by the Auditor of Public Accounts of the Commonwealth of Virginia. Liens attach to the property when the tax remains unpaid after July 1 of the following year. The billings are considered past due after the respective tax billing date at which time the applicable property is subject to a 10% penalty and interest is assessed 30 days therefrom.

#### 3. Restricted Assets

*Customer Deposits* - The Town collects a utility deposit from renters when the homeowners request a deposit. Under certain circumstances, the deposit is refunded. Cash is restricted to set aside resources for future refunding along with a related customer deposit liability.

*Bond Fund Escrow* - The 2003 Series Revenue Bonds require that the bond proceeds be held in escrow by the Virginia Resources Authority (VRA). The VRA makes all payments from the escrow based on requisitions prepared by the Town. The bonds were authorized to finance improvements to the Town's water and sewer system and to refund certain outstanding debt.

### 4. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates

#### 5. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Such assets are recorded at cost or estimated historical cost if purchased or constructed. Donated fixed assets are recorded at their estimated fair value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized. The Town has adopted GASB Statement No. 51, *Accounting for Financial Reporting for Intangible Assets*. This statement requires all identifiable assets not excluded by its scope provisions be classified as capital assets.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. The total interest expense incurred by the utility fund during the current fiscal year was \$278,098. No interest expense was included as part of the cost of capital assets under construction in connection with water and sewer construction projects for FY16.

## NOTES TO THE FINANCIAL STATEMENTS

### I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### D. Assets, Liabilities and Net Position or Fund Balance (Continued)

#### 5. Capital Assets (Continued)

Property, plant and equipment of the primary government is depreciated using the straight line method over the following estimated useful lives:

Types of Assets	Years
Buildings	39-50
Improvements other than buildings	10-15
Equipment and vehicles	5-10
Sidewalk improvements	15
Utility distribution system	15-50

#### 6. Compensated Absences

It is the Town's policy to permit employees to accumulate earned by but unused vacation and sick pay benefits. All vacation and sick pay is accrued when incurred in the government-wide and proprietary fund financial statements. Vacation and sick pay that is expected to be liquidated with expendable available financial resources is reported as an expenditure and a fund liability of the governmental fund.

#### 7. Long-term Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as accounting charge on refinance, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount or accounting charge.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as an other financing source. Premiums received on debt issuances are reported as other financing sources, while discounts of debt issuances are reported as other financing uses. Issuance costs, even if withheld from the actual net proceeds received, are reported as debt service expenditures.

## 8. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position and or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Town of Round Hill has two items that qualify for reporting in this category: (1) Deferred charge on refunding debt reported in the proprietary funds financial statement of net position and government wide financial statement of net position. A deferred charge on refunded debt results from the difference in the carrying value of the refunded debt and its reacquisition price.

## NOTES TO THE FINANCIAL STATEMENTS

## I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### D. Assets, Liabilities and Net Position or Fund Balance (Continued)

#### 8. Deferred Outflows/Inflows of Resources (Continued)

This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt; and, (2) Deferred pension obligation reporting in the proprietary funds financial statement of net position and in the governmental and business-type activities in the government wide financial statement of net position. A deferred charge pension obligation results from advance payments on the pension funding prior to the actuarial report establishing the funding requirement.

In addition to liabilities, the statement of net position and or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Town of Round Hill has two items which qualify for reporting in this category: (1) Under modified accrual basis of accounting under the governmental funds, unavailable revenue, is reported in the governmental funds balance sheet. The governmental funds report unavailable revenues from real estate taxes. The amounts are deferred and recognized as an inflow of resources in the period that the amounts become available; and, (2) Deferred pension inflow reported in the government wide financial statement of net position and in the governmental and business-type activities in the government wide financial statement of net position. The deferred pension inflow results from the net difference between projected and actual earnings on plan investments.

### 9. Fund Balance

The Town has adopted GASB Statement 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This Statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on a government's fund balance more transparent. The following classifications describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

- *Nonspendable Fund Balance* amounts that are not in spendable form (such as inventory and prepaid) or are required to be maintained intact (corpus of a permanent fund);
- **Restricted Fund Balance** amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions, or by enabling legislation;
- *Committed Fund Balance* amounts constrained to specific purposes by a government itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint;
- Assigned Fund Balance amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority;
- *Unassigned Fund Balance* amounts that are available for any purpose; positive amounts are only reported in the general fund.

When fund balance resources are available for a specific purpose in more than one classification, it is the Town's policy to use the most restrictive funds first in the following order: restricted, committed, assigned, and unassigned as they are needed.

## NOTES TO THE FINANCIAL STATEMENTS

## I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### D. Assets, Liabilities and Net Position or Fund Balance (Continued)

#### 9. Fund Balance (Continued)

Town Council establishes (and modifies or rescinds) fund balance commitments by passage of an ordinance. This is typically done through adoption and amendment of the budget. A fund balance commitment if further indicated in the budget document as a designation or commitment of the fund (such as for special incentives). Assigned fund balance is established by Town Council through adoption or amendment of the budget as intended for specific purpose (such as the purchase of capital assets, construction, debt service, or for other purposes).

#### 10. Net Position

Net position is the difference between assets and liabilities. Net position invested in capital assets represent capital assets, less accumulated depreciation less any outstanding debt related to the acquisition, construction or improvement of those assets.

#### E. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Town's Retirement Plan and the additions to/deductions from the Town's Retirement Plan's net fiduciary position have been determined on the same basis as they were reported by the Virginia Retirement System (VRS). For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

### II. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

### A. Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles. Annual appropriated budgets are adopted for the general fund. All annual appropriations lapse at fiscal year end to the extent they have not been expended or lawfully encumbered. Budgets for the enterprise funds serve as a spending guide and do not constitute legally binding limitations.

Before July 1, the proposed budget is presented to Town Council for review. The council holds public hearings and may add to, subtract from or change appropriations, but may not change the form of the budget. Any changes in the budget must be within the revenues and reserves estimated as provided by the Town treasurer. Expenditures may not legally exceed budgeted appropriations at the department level.

The appropriated budget is prepared by fund, function, and department. The Town's council made budgetary modification during the year but did not change the total original appropriation.

#### **B.** Excess of Expenditures over Appropriations

For the year ended June 30, 2016, the general fund public safety department expenditures exceeded appropriations by \$1,827.

## NOTES TO THE FINANCIAL STATEMENTS

### III. DETAILED NOTES ON ALL FUNDS AND ACCOUNT GROUPS

#### A. Deposits and Investments

#### **Deposits**

At year-end the carrying amount of the Town's deposits with banks and savings institutions was \$5,074,955 and the bank balance was \$5,112,101.

All of the Town's deposits were covered by Federal Depository Insurance or collateralized in accordance with the Virginia Security for Public Deposits Act. Under the Act, banks holding public deposits in excess of the amounts insured by the FDIC must pledge collateral in the amount of 50% of excess deposits to a collateral pool in the name of the State Treasury Board. Savings and loan institutions are required to collateralize 100% of deposits in excess of FDIC limits. The State Treasury Board is responsible for monitoring compliance with the collateralization and reporting requirements of the Act and for notifying localities of compliance by banks and savings and loans. The funds deposited in accordance with the requirements of the Act are considered fully secured and thus are not categorized below as to credit risk.

#### Investments

Statutes authorize the Town to invest in obligations of the United States or agencies thereof, obligations of the Commonwealth of Virginia or towns thereof, obligations of the International Bank for Reconstruction and Development (World Bank), the Asian Development Bank, the African Development Bank, prime quality commercial paper and certain qualifying corporate notes, bankers acceptances, repurchase agreements and the State Treasurer's Local Government Pool.

As of June 30, 2016, the Town's investments were held in bond escrow pooled accounts and not required to be categorized and are summarized as follows:

	Carrying			
Туре	Amount Fair			ir Value
Bond Escrow Pooled Funds	\$	26,449	\$	26,449

## NOTES TO THE FINANCIAL STATEMENTS

## III. DETAILED NOTES ON ALL FUNDS AND ACCOUNT GROUPS (CONTINUED)

### **B.** Receivables

Receivables as of year end for the government's individual funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	(	General Ut		Total	
Receivables:					
Delinquent taxes	\$	13,725 \$	- 5	\$ 13,725	
Accounts		-	275,920	275,920	
Intergovernmental		22,490	-	22,490	
Franchise, and utility taxes		1,154	-	1,154	
Other		24,162	53,933	78,095	
Net total receivables	\$	61,531 \$	329,853	\$ 391,384	

Governmental funds reported deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, the deferred revenue reported in the governmental funds was \$14,065 representing delinquent property taxes in the general fund.

At June 30, 2016 amounts due from other governments were as follows:

Description/Payer	G	General
Commonwealth of Virginia - Fire Department, Communication Tax	\$	10,117
Loudoun County - Sales Tax		12,373
	\$	22,490

#### E. Long-Term Debt

General Obligation Bonds. The Town issues general obligation bonds to provide funds for the acquisition and construction of major capital facilities and for refunding of general obligation bonds. A general obligation bond has been issued for proprietary activities. This bond is reported in the proprietary funds as it is expected to be repaid from proprietary fund revenues. General obligation bond is direct obligation and pledge the full faith and credit of the Town. These bond generally is issued as serial bond with amount of principal maturing each year. General obligation bond and note outstanding at June 30, 2016 are as follows:

Description	Amount
\$6,905,000 Virginia Resources Authority general obligation refunding bond, series 2009, 25	
year bond dated June 17, 2009, at a varying interest rate of 1.125% to 5.030%, due in 25 annual

#### Advance Refundings

The Town issued 2009 series \$6,905,000 general obligation refunding bonds to provide resources for advance bonded debt refunding. The Town advanced refunded the 2001 \$4,130,000 and 2003 \$2,305,000 bond debt. As a result, the refunded bonds are considered to be defeased and liability removed from bonded debt obligations. The reacquisition price exceeded the net carrying amount of the old debt by \$495,610 and is expensed as an accounting loss on refinancing. The advance refunding was undertaken to improve current cash flow by reducing the next five (5) years debt service requirements. Total debt service payments over the 25 year life of the new bonded debt increased by \$2,302,376 with an estimated economic loss of \$328,927.

## F. Restricted Net Position

The balances of the restricted asset accounts are as follows:

Description	Amount	
Utility fund customer deposits	\$ 15,966	
Utility fund bond escrows	26,449	
	\$ 42,415

#### IV. OTHER INFORMATION

#### A. Office Lease Agreement

The Town entered into an agreement with the County of Loudoun, Virginia to lease office space in the Town Hall office building. The lease agreement was extended on March 31, 2015 for one year and then month to month thereafter. Current monthly rental income is \$2,914.

#### **B.** Risk Management

The Town is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. To reduce insurance costs and the need for self-insurance, the Town has joined together with other municipalities in the Commonwealth of Virginia in several public entity risk pools (not self-insured) that operate as common risk management and insurance programs for member municipalities. The risk pools include:

VMGSIA: The Town has workers' compensation coverage with the Virginia Municipal Group Self Insurance Association (VMGSIA). During the fiscal year 2016 the Town paid premiums of approximately \$9,703 to VMGSIA.

VMLP: The Town has general and excess liability, automobile, property, boiler and machinery, law enforcement liability, public officials, legal liability, and commercial crime insurance with the Virginia Municipal Liability Pool (VMLP). During the fiscal year 2016, the Town paid contributions of approximately \$31,838 to the VMLP.

The town continues to carry the above commercial insurance for risks of loss. Settled claims have not exceeded insurance coverage in any of the past three fiscal years.

### C. Surety Bonds

The Town maintains a \$25,000 blanket surety bond on all employees through the VMLP.

#### IV. OTHER INFORMATION

#### **D.** Defined Benefit Pension Plan

## **Plan Description**

Name of Plan:	Virginia Retirement System (VRS)
Identification of Plan:	Agent and Cost-Sharing Multiple-Employer Defined Benefit Pension Plan
Administering Entity:	Virginia Retirement System (VRS)

All full-time, salaried permanent employees of the Town are automatically covered by VRS Retirement Plan upon employment. This plan is administered by the Virginia Retirement System (the System) along with plans for other employer groups in the Commonwealth of Virginia. Members earn one month of service credit for each month they are employed and for which they and their employer are pay contributions to VRS. Members are eligible to purchase prior service, based on specific criteria a defined in the *Code of Virginia*, as amended. Eligible prior service that may be purchased includes prior public service, active military service, certain periods of leave, and previously refunded service.

The System administers three different benefit structures for covered employees – Plan 1, Plan 2, and, Hybrid. Each of these benefit structures has a different eligibility criteria. The specific information for each plan and the eligibility for covered groups within each plan are set out in the table below:

	<b>Retirement Plan Provisions</b>	
Plan 1	Plan 2	Plan 3
About Plan 1	About Plan 2

## **Employees Covered by Benefit Terms**

As of the June 30, 2013 and 2015 actuarial valuation, the following employees were covered by the benefit terms of the pension plan:

	June 30,	
	2013	<u>2015</u>
	Nur	nber
Inactive members or their beneficiaries currently receiving benefits	3	6
Inactive members:		
Vested inactive members	3	2
Non-vested inactive members	3	1
Inactive members active elsewhere in VRS	7	7
Total inactive members	13	10
Active members	10	11
Total covered employees	26	27

#### Contributions

The contribution requirement for active employees is governed by §51.1-145 of the *Code of Virginia*, as amended, but may be impacted as a result of funding options provided to towns by the Virginia General Assembly. Employees are required to contribute 5.00% of their compensation toward their retirement. Prior to July 1, 2012, all or part of the 5.00% member contribution may have been assumed by the employer. Beginning July 1, 2012 new employees were required to pay the 5% member contribution. In addition, for existing employees, employers were required to begin making the employee pay the 5.00% member contribution. This could be phased in over a period of up to 5 years and the employer is required to provide a salary increase equal to the amount of the increase in the employee-paid member contribution.

The Town's contractually required contribution rate for the year ended June 30, 2016 was 4.97% of covered employee compensation. This rate was based on an actuarially determined rate from an actuarial valuation as of June 30, 2013.

This rate, when combined with employee contributions, was expected to finance the costs of benefits earned by employee during the year, with an additional amount to finance any unfunded accrued liability. Contribution to the pension plan from the Town were \$33,491 and \$45,208 for the years ended June 30, 2016 and June 30, 2015, respectively.

## NOTES TO THE FINANCIAL STATEMENTS

### IV. OTHER INFORMATION (CONTINUED)

### D. Defined Benefit Pension Plan (Continued)

### **Net Pension Liability**

The Town's net pension liability was measured as of June 30, 2015. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation performed as of June 30, 2013, using updated actuarial assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2015.

### **Actuarial Assumptions – General Employees**

The total pension liability for General Employees in the Town's Retirement Plan was based on an actuarial valuation as of June 30, 2013, using the Entry Age Normal actuarial cost method and the following assumptions, applied to all periods included in the measurement and rolled forward to the measurement date of June 30, 2015.

Inflation	2.5 percent
Salary increases, including inflation	3.5 percent - 5.35%
Investment rate of return	7.0 percent, net of pension plan investment
	expense, including inflation*

\* Administrative expenses as a percent of the market value of assets for the last experience study were found to be approximately 0.06% of the market assets for all of the VRS plans. This would provide an assumed investment return rate for GASB purposes of slightly more than the assumed 7.0%. However, since the difference was minimal, and a more conservative 7.0% investment return assumption provided a projected plan net position that exceeded the projected benefit payments, the long-term expected rate of return on investments was assumed to be 7.0% to simplify preparation of pension liabilities.

Mortality rates: 14% of deaths are assumed to be service related

### Long-Term Expected Rate of Return

The long-term expected rate of return on pension System investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension System investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimate of arithmetic real rates of return for each major asset class are summarized in the following table:

\*\*\* \* \* \* \*

			Weighted Average
		Arithmetic Long-	Long-Term
	Target	<b>Term Expected</b>	Expected
Asset Class (Strategy)	Allocation	<b>Rate of Return</b>	<b>Rate of Return</b>
U.S. Equity	19.50%	6.45%	1.26%
Developed Non U.S. Equity	16.50%	6.28%	1.04%
Emerging Market Equity	6.00%	10.00%	0.60%
Fixed Income	15.00%	0.09%	0.01%
Emerging Debt	3.00%	3.51%	0.11%
Rate Sensitive Credit	4.50%	3.51%	0.16%
Non Rate Sensitive Credit	4.50%	5.00%	0.23%
Convertibles	3.00%	4.81%	0.14%
Public Real Estate	2.25%	6.12%	0.14%
Private Real Estate	12.75%	7.10%	0.91%
Private Equity	12.00%	10.41%	1.25%
Cash	1.00%	-1.50%	-0.02%
Total	100.00%		5.83%
		Inflation	2.50%
	* Expected arith	matic normal return	8.33%

\* Using stochastic projection results provides an expected range of real rates of return over various time horizons. Looking at one year results produces an expected real return of 8.33% but also has a high standard deviation, which means there is high volatility. Over larger time horizons the volatility declines significantly and provides a median return of 7.44%, including expected inflation of 2.50%.

### NOTES TO THE FINANCIAL STATEMENTS

#### IV. OTHER INFORMATION (CONTINUED)

### D. Defined Benefit Pension Plan (Continued)

## **Discount Rate**

The discount rate used to measure the total pension liability was 7.00%. The projection of cash flows used to determine the discount rate assumed that System member contributions will be made per the VRS Statutes and the employer contributions will be made in accordance with the VRS funding policy at rates equal to the difference between actuarially determined contribution rates adopted by the VRS Board of Trustees and the member rate. Through the fiscal year ending June 30, 2018, the rate contributed by the employer for the Town Retirement Plan will be subject to the portion of the VRS Board-certified rates that are funded by the Virginia General Assembly. From July 1, 2018 on, participating employers are assumed to contribute 100% of the actuarially determined contribution rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore the Long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

### D. Defined Benefit Pension Plan (Continued)

## Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Town using the discount rate of 7.00%, as well as what the Town's net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.00%) or one percentage point higher (8.00%) than the current rate:

	(6.00%)	Ra	ate (7.00%)	(8.00%)			
Town's Net Pension Liabillity (Surplus)	\$ (34,492)	\$	(160,759)	\$	(322,262)		

#### Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2016, the Town recognized pension expense of \$14,982. At June 30, 2016 the Town reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	 red Outflows Resources	Deferred Inflows of Resources				
Differences between expected and actual experience	\$ 23,616	\$ -				
Change in assumptions	-	-				
Net difference between projected and actual earnings						
on pension plan investments	-	36,117				
Employer contributions subsequnt to the						
measurement date	 -	 -				
Total	\$ 23,616.0	\$ 36,117				

All above amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30,	Amortization
2017	\$ (1,052)
2018	(3,970)
2019	(14,319)
2020	6,840

## Notes to Required Supplemental Information

**Changes of benefit terms** – There have been no significant changes to the System benefit provisions since the prior actuarial valuation. A hybrid plan with changes to the defined benefit plan structure and a new defined contribution component were adopted in 2012. The hybrid plan applies to most new employees hired on or after January 1, 2014 and not covered by enhanced hazardous duty benefits. The liabilities presented do not reflect the hybrid plan since it covers new members joining the System after the valuation date of June 30, 2013.and the impact on the liabilities as of the measurement date of June 30, 2015 are minimal.

**Changes of assumptions** – The following changes in actuarial assumptions were made effective June 30, 2013 based on the most recent experience study of the System for the four-year period ending June 30, 2012:

## Largest 10 – Non-LEOS:

- Update mortality table
- Decrease in rates of service retirement
- Decrease in rates of disability retirement
- Reduce rates of salary increase by 0.25% per year
- Largest 10 –LEOS:

# TOWN OF ROUND HILL, VIRGINIA COMPUTATION OF LEGAL DEBT MARGIN JUNE 30, 2016

Assessed value of taxable real property	\$ 83,070,590
Debt limit (10% of assessed value)	8,307,059
Amount of debt applicable to debt limitation	 -
Legal debt margin	\$ 8,307,059

Section 15.1-176 of 1950 Code of Virginia, as amended, limits to 10% of the assessed valuation of the real estate subject to taxation as the amount of debt which can be issued by the town. Debt includes any bonds or other interest bearing obligations including existing indebtedness. Excluded from the debt margin calculation are bonds payable from enterprise funds issued under Article VII Section 10(a)(2) of the Constitution of Virginia (formerly Clause (B) of Section 127 of the Constitution of Virginia). This exclusion applies to the 2009 bond obligations.

Taxable assessed value is as of January 1, 2015 and excludes real property owned by public service corporations, other supplements and reduced for abatements and elderly relief.
